

# CASE STUDY

## Benromach Distillery 200 Panel 50kWp System

### Project Overview

Benromach distillery and AES Solar are but a 5 minute walk apart from each other in the small town of Forres, Scotland. It made sense that they would work together on this project to fit the distillery with solar energy as both AES and Benromach pride themselves with strong company values and delivering a top quality service and product. The installation of solar energy systems shows an awareness of environmental issues and a level of corporate and social responsibility that is recognized domestically and internationally.

Working together AES and Benromach created a system that would fulfil the requirements set out for performance, quality and price whilst delivering maximum efficiency, provide adequate power for the distillery and a healthy return on investment.

Technical Overview	
Client	Benromach Distillery
Array Size	200 Panels
Performance	42,000 kWh / yr
CO <sub>2</sub> Savings	18,880 kg / yr

**AES Solar offers extensive experience with solar systems for both domestic and business clients. Established in 1979, let us power you up!**
